III. BOAC Agenda Items Concerning VNY	<p>The Aircraft are suppose to fly out over Sepulveda basin WP3 before they DO the turns. I am sitting inside my home with non stop as today 9/5/2023 from 3pm and on (many days of this) all the small planes flying out over Woodley in to the neighborhood east in a NO FLY ZONE BEFORE Victory Blvd. still gaining altitude and maybe coming 90ft over the homes early turns . THE NOISE is above the aloud decibel allowed by LAWA FAA. There was a sound study done on Kittridge st. and Woodley Ave(wear the sound has been incredible loud) and a result resolution done 2015 .</p> <p>The problem is it is NOT being followed by the air traffic controller or flight schools etc . they are not following the pilot book where it is written. Please Implement the resolution that was agreed to by stakeholders and VNY and LAWA FAA. The complaints of noise have been ignored. The phone line and website to file the complaints is not working and the phone just hangs up on you . PLEASE implement and WHY are we having another NOISE IMPACT STUDY WHEN THERE WAS ALREADY DONE!!!!</p>	CAC-PubCom-00677	9/5/2023	09/05/23 3:48 PM
VI. c. Community Presentation on the Vision Study (Sue Steinberg et al) - Discussion/Action	<p>The Vision Study MUST balance community concerns with the reality that this airport provides huge economic impacts to the community in the form of jobs, tax revenues, and other direct payments.</p> <p>The vision study should also prioritize the needs of local aircraft owners and operators over the desires of transient aircraft and the service providers who cater to them.</p>	CAC-PubCom-00676	9/5/2023	09/05/23 9:25 AM
IV. Public Comment Period	<p>My husband and I moved to Woodland Hills 12 years ago, south of the boulevard, south of Taft High School, after saving for our purchase for many years. After experiencing a very traumatic event, it had been our refuge. Until about 2 -3 years ago. Since then, there is a never ending inundation of commercial jets, private jets and prop planes, helicopters and police helicopters. On a good day, we only get one every minute. It's somehow worse on holidays, weekends and days when the weather is beautiful. We are terrified of an expansion at Van Nuys Airport. Even if it does go through, is there a reason why every single aircraft has to go over our specific neighborhood? Why are we the panama canal of air traffic, as my neighbor calls it? And have there been studies done on the environmental effect of all this jet fuel pouring down on us? I guess my basic question is, why were we deemed so expendable?</p>	CAC-PubCom-00678	9/5/2023	09/05/23 5:46 PM
