Scott	Crane	V. PUBLIC COMMENT PERIOD	I have lived in Sherman Oaks for over 20 years and since they changed the flight paths, planes have been flying directly over my home at low altitude's most days almost every 30-60 seconds! It was never like this before and now I can't even hear myself think and I get woken up sometimes in the middle of the night and always in early mornings. Since Covid -19 I have been working home and it's to the point where I can't even concentrate, since the noise is so extreme and extremely disrupting! It has ruined my way of life in this quiet peaceful neighborhood. Additionally I'm concerned about the health hazards from the airplanes exhaust and fuel. This has been going on way too long and has really gotten to the point where it's unbearable to me and my family!!	1/5/2021	01/04/21 11:31 AM
King	Chloe	V. PUBLIC COMMENT PERIOD	I moved into Sherman Oaks in August. I had no idea that there was a problem. Since then, the problem is not only clear, but it is devastating! The NextGen changes the FAA has made illegally, have directly effected the skies over so many. The noise pollution is horrific and insanity making, but the health ramifications of the so many planes flying so low could have too many long term consequences to count. We are being poisoned by these changes. Pure and simple. We will fight until changes are made. Make no mistake.	1/5/2021	01/04/21 11:48 AM
Chloe	King	V. PUBLIC COMMENT PERIOD	I would like to submit an environmental impact study performed by a renowned Environmental Health Professor at UCLA, regarding the direct health and environmental effects of the NextGen changes at the FAA. Changes that Van Nuys Airport has adapted. It is grim and hits home the fact that these changes are poisoning the citizens below: https://www.dropbox.com/s/dlsr8c56ejpdiry/declaration_Yifang%20Zhu_07172020_mod.pdf?dl=0	1/5/2021	01/04/21 12:22 PM
