Sue	Steinberg	I. PUBLIC COMMENT PERIOD	Once again, we who live in close proximity of the Van Nuys Airport are suffering the toxic fumes and noise affects of the recent increase in jet activity. There is a need to put on the agenda a vote to have SoCal AQMD do a air quality study ASAP. We are being bombarded with toxic fumes on a daily basis - and it needs to be studied and documented. The planes being worked on in the hangers along Hayvenhurst (between Saticoy & Sherman Way) idle for long periods of time - spewing TOXIC FUMES into our neighborhood. Why was there never an EPA study done before - and why isn't there one being done NOW? PLEASE GET THIS ON THE NEXT AGENDA!	11/30/2021	11/30/21 12:21 PM
Karen	Fritschi	I. PUBLIC COMMENT PERIOD	The Quieter Nights Program is not working and we are regularly woken by noisy jets taking off between midnight and 5am. We need AQMD to carry out a qualified air study with accurate equipment to collect data around the airport, and in particular in the residential areas west of the airport as jet exhaust fumes are very noticeable. Helicopters do not follow the designated flight paths and are constantly flying over the neighborhood.	11/30/2021	11/30/21 12:43 PM
Fera	Ayup	I. PUBLIC COMMENT PERIOD	Hello, 1. The Quieter Nights Program is NOT working. We are getting a lot of NOISE from jets at all hours of the day and night (example: last night at 12:15 am, 12:25am, 2:50am...etc.) 2. We need to have AQMD do an AIR QUALITY STUDY here in The Pocket ASAP. A qualified study with accurate equipment is needed to collect the data, so they can see what we have been living with the past couple of years. Since the last study was done in 2005, there's been a huge increase in air traffic. Also, that study did not even include our area, WEST of the Van Nuys Airport. 3. Helicopters are not following the designated flight paths and constantly fly over the neighborhood – which they are not supposed to do. Thank you.	11/30/2021	11/30/21 1:22 PM
Norma	Mejia	I. PUBLIC COMMENT PERIOD	Our lovely community is being bombarded with extremely loud airplanes going off at all hours of the day. Some even at 2am. Our air quality is going from bad to worse. We fear for our health. When my children and I are outside and jet fuel goes in our homes, we instantly cover our faces and run inside. Please help.	11/30/2021	11/30/21 3:57 PM
Suzanne	Gutierrez-Hedges	I. PUBLIC COMMENT PERIOD	<u>I live one block west of the Van Nuys Airport. The increase in traffic in the past few years is unbearable. "Quieter Nights Program" is NOT working. Just last night after midnight TWO jets made such loud noise I could hear it through my closed doors. Also, the amount of jet fumes that permeate our neighborhood is toxic. I can't even walk my dogs or work outside without inhaling these fumes. Jets often idle, even in APU mode, and the fumes are horrendous. Last air quality study was in 2005. AQMD MUST do another study. This airport has grown exponentially and we are all suffering. Lastly, I have many videos of chartered helicopters flying over our neighborhood and completely disregard the flight paths. I have been in touch with Jonah Glickman with Nury Martinez' office, who also contacted VNY, yet nothing has changed. This behavior is reckless and irresponsible. Here is a link to watch. I have additional/more recent footage. https://vimeo.com/manage/videos/640025706/privacy Password: BadHelicopter Thank you for time and consideration.</u>	11/30/2021	11/30/21 6:19 PM
