sue	steinberg	III. PUBLIC COMMENT PERIOD	Once again many of us want to see the CAC put forth a motion to get AQMD to do an AIR QUALITY STUDY of the areas around and including the Van Nuys Airport. Thousands of us living adjacent to VNY are being bombarded daily with toxic fumes. This along with the stressful noise from the jets taking off and landing at all hours. LAWA and the FAA have been negligent in doing any kind of environmental study or research in either. THEIR PRIVATE JETS ARE KILLING US!!	2/1/2022	02/01/22 10:05 AM
West Hills	Spencer Family	III. PUBLIC COMMENT PERIOD	I came into the meeting during the ramblings David whom, one might conclude, seems to be compensated for making public comment that is supportive of the charters but void of any substance based in reality. The quiet nights program is far from a success, and LAWA's public outreach is dismissal in respect to meaningful public input on the dire consequences that come from excessive VNY operations that exceed sustainability for both home and local environments to date. CAC's Chair refuses to put any of the public's concerns on the agenda, including the Master Plan and the need for a SFV Community Working Group Ad-Hoc. In fact, Jason is it?, seems to think CAC is there to provide a shield for VNY business, hence the reason we need a real community driven platform that operates based on morals and common sense. All of the rhetoric that VNY benefits communities is not seen outside of tax deduction actions, which does not constitute public benefit. What the public is getting is irresponsible aviation activity that is poisoning and choking the Valley. You want to benefit the community? Have LAWA put their money where their mouth is and fund a critically needed community Ad-Hoc, stop inflating employment numbers, as well as alleged economic contributions. We want to see ethical behavior that allows a GA airport to benefit society, not rape it of any semblance of quality of life.	2/1/2022	02/01/22 7:59 PM
