Airport Carbon Accreditation
Level 3 Requirements
June 2019
What is Airport Carbon Accreditation?

- Airport Carbon Accreditation (ACA) is a voluntary carbon management program specifically for airports.
- The program was launched by ACI Europe in 2009.
- ACA sets requirements for airports for measuring and reducing their carbon emissions, with the ultimate goal of becoming carbon neutral.
Airports can apply for one of four levels.

- Level 1: Mapping
- Level 2: Reduction
- **Level 3: Optimization**
- Level 3+: Neutrality

Currently, VNY is at Level 2, but is pursuing Level 3 in 2019.
Stakeholder Engagement Plan

VNAA OBJECTIVES

- Build Business and Community Partnerships
- Support the Current and Future Aviation Workforce
- Safeguard the Interests of Airport Tenants
- Promote General Aviation
- Attract and Retain Employers and Jobs

- Monitor for Changes
- Identify Stakeholders
- Identify Stakeholder Needs/Wants
- Conduct Outreach/Manage Expectations
- Establish Messages
